# Lead SaaS Python Developer

Our customers are located worldwide and we are playing in the fast moving mobile ecosystem. esChecker is a product designed to disrupt the security testing of mobile applications with providing services to automate the security testing and manage the processes related to the compliance of an app to the guidances and regulations.

Based on the latest technologies of web and mobile development as well as cloud infrastructure, the mission is to lead the development of the complete production in an industrial manner from technical specifications to delivery.

This position is particularly dedicated to passionate senior software engineers, keen to take the responsibility of a full development program composed of a group of experts. You will join a dynamic environment, with agile development.

Your day-to-day at eShard for this position

You are in charge of leading the development of the program. For this, you schedule every task and make sure they are delivered in due time. A quick review with the team will be necessary to get everything lined up. You are strongly involved in the development tasks and you are striving to make your code clean and efficient.

You take the architectural lead on a new exciting feature, and you will involve the technical management to make sure that your new design will fit the internal vision and the customer needs. During efficient and crisp meetings with your team, you quickly grasp how it should be implemented and who could do it. Then you create a detailed issue that you add to a future milestone in gitlab and you will be able to follow-up the good delivery of the fix. You are the owner of the software roadmap and you make sure that it is properly communicated to the relevant persons.

You will finish your day by approving a few merge requests as you are accountable for all developments in this program.

You mainly work from our office in Pessac, France; it's important to have a place of work to meet and hang out. Parts of a project may require interacting with customers all over the world. Our office culture is highly technical, our organisation fairly flat and our mindset flexible.

This position is open to any education degrees. eShard provides an attractive remuneration package including an incentive plan and good health insurance.

You are

Within eShard, you are excited about developing your skills and knowledge in an finternational and highly dynamic technical environment.

What describes yourself includes:
- You are a technical leader,
- You are recognized as being a true Saas expert mastering Kubernetes & Dockers technologies,
- You live by Python,
- TDD and CI/CD process is your way of life
- You have the sense of delivery,
- You enjoy preaching good practice and mentoring other developers,
- You hate long meetings,
- You have a proficient level in English both verbally and on paper,
- You are not afraid to ask questions and enjoy having technical discussions,
- BONUS: you know about Javascript, C, AOSP and/or kernel development

About eShard

eShard is a five years old internationally-focused company developing with a strong innovation path in cyber-security. A particular area of strength is the security expertise for embedded and mobile products (including mobile app security, embedded software security, Trusted Execution Environment, embedded cryptography attacks).

Our highly educated R&D teams are continuously analyzing current and potential security threats, it enables us to be at the state of the art of attacks and protection or beyond it.

We think that great software are important for security, that's why we are selling high value software that are first in class.

We help customers to put the right amount of security in their product, and validate that with practical tests.
